APPLICANTS' SUPPLEMENTAL RESPONSE

Commissioner for Patents  
Washington, DC 20231

Sir:

In a communication from the Examiner dated mailed March 28, 2001, the Applicants were informed that a previously filed response was deemed non-responsive for failure to provide a Sequence Listing. A petition for a three month extension of time accompanies this submission.

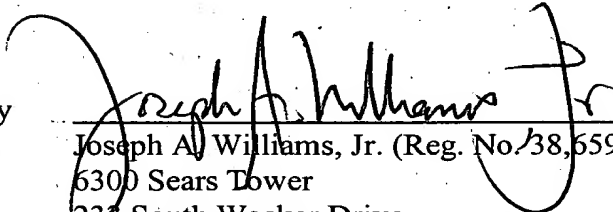

The requested Sequence listing is submitted herewith in both paper and computer-readable formats. A statement as required under the 37 CFR §1.821(f) and (g) accompanies this submission. Because this is the first submission of a Sequence Listing, amendment to the specification is necessitated to include reference to the sequence identifier numbers. Rather than providing individual substitute pages, the Applicants have provided a substitute specification in which sequence identifiers are included. The Applicants therefore request that the substitute specification be entered in the application.

The amendments include no new matter.

Respectfully submitted,

MARSHALL, O'TOOLE, GERSTEIN,  
MURRAY & BORUN
